

Priyankar Bhattacharjee

PhD Researcher in Human-Computer Interaction

priyankarb@iiitd.ac.in | [LinkedIn](#) | Bluesky: techimonki.bsky.social

A-418 R&D IIIT-D, New Delhi, 110020, India

Professional Summary

Human-Computer Interaction researcher focused on designing inclusive digital experiences for older adults. Expertise in qualitative research methods, digital accessibility, and gerontechnology with a strong foundation in software engineering.

Research Interests

Digital Inclusion of Older Adults • Ageing & Digital Divide • Human-Computer Interaction • Gerontechnology • Skills Acquisition • Human Behaviour

Education

PhD in Human-Computer Interaction

IIIT-Delhi, New Delhi, India | 2025 - Present

- Accessibility and Inclusive Design
- Cognitive Processes
- Digital Ethnography
- Ethics
- User Research

MS in Telecommunications Engineering

University of Nebraska-Lincoln, USA | 2012 - 2015

- Network Security
- Wireless Sensor Networks
- Web Development

BE in Electrical Engineering

Nagpur University, India | 2005 - 2009

- C Programming
- Micro-Controllers

Publications

Bhattacharjee, P., Baker, S., & Waycott, J. (2021). *Older adults and their acquisition of digital skills: A review of current research evidence*. ACM.

Systematic literature review examining the challenges older adults face when learning digital skills, identifying five primary barrier categories and offering recommendations for improving digital skills training.

Bhattacharjee, P. (2015). *VCare: A Personal Emergency Response System to Promote Safe and Independent Living Among Elders Staying by Themselves in Community or Residential Settings*. Master's thesis, University of Nebraska-Lincoln.

An ICT solution for remote monitoring of older individuals, presenting a robust, cost-effective, and secure system design enabling caregivers to monitor functional status and receive emergency alerts.

Bhattacharjee, P. (2015). *Workplace monitoring of employee health using the workstation PC as a platform*. IEEE. Novel approach to healthcare monitoring utilising office workstation PCs to track employee health, reducing reliance on wearable devices and traditional telehealth systems.

Bhattacharjee, P. (2015). *The Computer Mouse as a health monitoring tool aimed to alleviate the negative impact of missed appointments*. IEEE.

Novel remote health-monitoring approach that provides healthcare providers with real-time access to patient health status, reducing the need for routine clinical visits.

Service & Professional Activities

Peer Reviewer

- ACM CHI Conference on Human Factors in Computing Systems (Alt CHI, Asian CHI, LBW); 2021
- ACM International Conference on Interactive Media Experiences (IMX); 2021, 2026
- Cognitive Science Society Annual Meeting (Cog-Sci); 2021
- British Computer Society's Human Computer Interaction Conference (BCS HCI); 2025

Conference Volunteer

- India HCI 2025

Professional Experience

Software Development Engineer in Test 2

Comcast, India | 2022 - 2025

- Tested software products with a focus on quality assurance and participated in project planning.
- Specialised in Computer Networking and Session Initiation Protocol (SIP).

Researcher

University of Melbourne, Victoria, Australia | 2018 - 2022

- Conducted qualitative HCI research focusing on older adults and digital technology.
- Designed and conducted semi-structured interviews for research studies.
- Taught web programming course to graduate and post-graduate students.

Technology Analyst

Infosys Ltd., Mt. Laurel, NJ, USA | 2016 - 2018

- Created an interactive dashboard with charts and graphs, utilising Elasticsearch, Logstash, Kibana (ELK stack) and JavaScript. The dashboard allowed network engineers to monitor traffic and detect anomalies.

System Application Developer

Gallup Inc., Omaha, NE, USA | 2014 - 2016

- Implemented front-end and back-end code changes to improve the user experience of the Gallup homepage using C# and SharePoint.

Software Engineer

Comviva, Bangalore, India | 2011 - 2012

- Developed tools and automated manual processes to enhance QA team efficiency.

Trainee Engineer

Tismo, Bangalore, India | 2010 - 2011

- Contributed to the development of software for tissue sample scanning using C#.

Technical Skills

UX Research: Digital Accessibility, WCAG, Inclusive Design, Empathy Maps, Persona, User Journeys

Qualitative Methods: Survey Design, Semi-Structured Interviews, Literature Review, Participant Recruitment, Ethics Application, Transcribing

Data Analysis: Excel, Qualtrics, Dashboard Design using JavaScript, Python

Software Engineering: Web Development, Software Testing, Requirements Gathering, Software Automation, Node.js, HTML5, CSS

Awards & Honors

NSF Student Travel Grant | 2014

U.S. National Science Foundation funding support for attending academic conferences and research events

Client Appreciation Award | 2018

Infosys Ltd. recognition for exceptional collaboration, innovation, and contributions to successful project outcomes

Certifications

How to Design for an Ageing Population | Interaction Design Foundation (IxDF), 2025
